Buttress's World Guide to Abbreviations of Organizations L. Pitman 2012-12-06 The previous edition of this directory extended its coverage of the Far East, Australasia and Latin America, areas previously under-represented. For this new edition emphasis has been given to increasing the number of entries for organizations from Britain, the United States and Australia, and particular attention has been paid to new political organizations in Central and Eastern Europe and the former Soviet Union. The number of entries included has gone up to over 68,000 of which over 9,000 are new or amended. Cross-references from defunct organizations in the previous edition have been deleted, and references (indicated by ex and now) added for organizations which have changed their name since the previous edition. As before, the range of organizations included is broad and only purely local organizations have been excluded. This directory therefore lists official and unofficial organizations, national and international, on all Subjects: political, economic and social. Acronyms of parent bodies of subsidiary organizations are given where appropriate and equivalencies are used to link acronyms in different languages for the same organization. Further information about the organizations listed can be found in the sources listed in the bibliography. I would like to thank Henry Heaney and Graeme Mackintosh for their advice, and David Grinyer for his technical support. L. M. Pitman Bibliography Adams, R. (ed.) Guide to Psychological Assessment with Asians Lorraine T. Benuto 2014-06-26 To effectively serve minority clients, clinicians require a double understanding: of both evidence-based practice and the cultures involved. This particularly holds true when working with Asian-Americans, a diverse and growing population. The Guide to Psychological Assessment with Asians synthesizes real-world challenges, empirical findings, clinical knowledge and common-sense advice to create a comprehensive framework for practice. This informed resource is geared toward evaluation of first-generation Asian Americans and recent immigrants across assessment methods (self-report measures, projective tests), settings (school, forensic) and classes of disorders (eating, substance, sexual). While the Guide details cross-cultural considerations for working with Chinese-, Japanese-, Korean and Indian-American clients, best practices are also included for assessing members of less populous groups without underestimating, overstating or stereotyping the role of ethnicity in the findings. In addition, contributors discuss diversity of presentation within groups and identify ways that language may present obstacles to accurate evaluation. Among the areas covered in this up-to-date reference: Structured and semi-structured clinical interviews. Assessment of acculturation, enculturation and culture. IQ testing. Personality disorders. Cognitive decline and dementia. Mood disorders and suicidality. Neuropsychological assessment of children, adolescents and adults. Culture-bound syndromes. Designed for practitioners new to working with Asian clients as well as those familiar with the population, the Guide to Psychological Assessment with Asians is exceedingly useful to neuropsychologists, clinical psychologists, health psychologists and clinical social workers.

Ketogenic Diet Vs Asian Diet Adam Peterson 2020-01-29 The ketogenic diet is a very low-carb, high-fat diet that shares many similarities with the Atkins and low-carb diets. It involves drastically reducing carbohydrate intake and replacing it with fat. This reduction in carbs puts your body into a metabolic state called ketosis. When this happens, your body becomes incredibly efficient at burning fat for energy. It also turns fat into ketones in the liver, which can supply energy for the brain. The Asian diet is an ancient and time honored way of eating. For thousands of years people of the Asian world have eaten a diet based on plant foods such as rice, vegetables, and fresh fruits. Unlike Western diets, meat is rarely the main dish of any meal but rather an accent and flavor compliment. Fish is often eaten in main courses.

The Glycemic Load Diet Guide: With High Fiber: High Protein: Complex Carbs Sarah Chastain 2014-05-12 Do you want to lose weight and keep it off? Increase your energy levels? If so, eating the low-GI High fiber, high protein with With Points + way could be the answer. The glycemic index diet is not a true low-carbohydrate diet because you don't have to count carbohydrates (carbs). Nor is it a low-fat diet. It also doesn't require you to reduce portion sizes or count calories. For the same you will find selected low carb low gi recipes. If you are looking for a structured diet that tells you exactly what types of foods to eat, how much, and when, Weight Watchers might not work for you. The ability to choose anything you want to eat may prove too tempting for some. It is completely possible to use all your Points on less-than-nutritious foods unless you consciously commit to making healthier decisions. They advertise, trying to convince overweight people that they can lose weight without sacrificing the foods they love. However, this is only achieved by allowing dieters to have calories that should be consumed on healthy food with very small portions of potentially unhealthy food. This strategy gives the dieter a false sense of the real nutritional changes they need to make in their lives for long-term success. If one seriously wants to lose weight and keep it off, they need to think more comprehensively about the foods they eat without the confusing points scheme. With the old points system, you could use your points anyway you like. But we now know if you use your points wisely by eating foods rich in protein and fiber -- these foods fill you up, keep hunger at bay, and help you lose weight in a healthier and more nutritious way. lose weight not muscles Proteins Proteins are the basic building blocks of every cell in your body. They are large compounds made of amino acids. In order to build, repair or rebuild enzymes and muscles, your body needs amino acids that can only be derived from protein. Protein is essential for weight loss because you lose muscle mass first when you diet, not fat High-Fiber Diet: Weight Control Wonder One of the best side effects of eating a high-fiber diet is that you may find it easier to maintain or even lose weight. According to the Harvard School of Public Health, most Americans get only 15 grams of dietary fiber a day, when they should be getting anywhere from 20 to more than 30 grams.

Proceedings of the Third Asia-Pacific Conference on Sustainable Energy and Environmental Technologies, Hong Kong, 3-6 December 2000 Xijun Hu 2001 With the rapid expansion of the Asia-Pacific economy in the last decade and the recovery after the recent crisis, severe demands will be placed on energy services and the environment. Coping with the volatile oil prices that persist in the market introduces an additional factor into the energy supply and demand equation, not just for countries in this region but also worldwide. Inevitably there will be implications for environmental issues too. The future will see a continuing challenge to balance growth with sustainability in the economic, social and environmental sectors. This conference, a sequel to the immensely successful APCSEET conferences held in Singapore and Australia, is aimed at meeting that challenge by addressing the pertinent issues related to sustainable energy and environmental protection. It provides a forum for participants from academia, industry and government agencies to interact, report on research in progress, and identify opportunities in the fields of sustainable energy and environmental technologies. The presentations include not only technical issues such as air pollution control, wastewater treatment, solid waste management, renewable energy and cleaner production, but also education and policy issues.

Teaching English in East Asia Clay H. Williams 2017-03-23 This book investigates the current EFL market in East Asia, focusing on K-12, university, and cram school English education in Japan, China, and Korea. It explores prevailing educational practices by both Asian learners and teachers of English, contrasting them with Western practices, and illuminating why Western pedagogical methods have often encountered tremendous resistance from teachers, administrators, parents, and students in the East Asian classroom context. After establishing this cultural contrast of pedagogical norms, the book presents a series of practical means for adapting Western teaching practices and philosophies to better suit the learning styles of East Asian students and the cultural context and practical realities of the East Asian classroom, offering both Western teachers working in East Asia and native East Asian teachers realistic plans for turning theory into successful practice. These plans are divided by subsections, focusing on the linguistic subskills being taught: listening/speaking, reading, and writing. Each section includes two contrasting lesson plans to demonstrate how the educational theories and practices promoted by the author can often be implemented by making relatively simple changes to existing practices that incorporate a fuller understanding of how to actively assist students in developing new learning styles and behaviors.
