Canadian Books in Print Marian Butler 2002-02 CBIP is the complete reference and buying guide to English-language Canadian books currently in print; consequently, the Author and Title Index, Subject Index and microfiche editions are indispensable to the book profession. With submissions from both small and large publishers, CBIP provides access to titles not listed anywhere else. Containing more than 48,000 titles, of which approximately 4,000 have a 2001 imprint, the Author and Title Index is extensively cross-referenced. The Subject Index lists the titles under 800 different subject categories. Both books offer the most complete directory of Canadian publishers available, listing the names and ISBN prefixes, as well as the street, e-mail and web addresses of more than 4,850 houses. The quarterly microfiche service provides updated information in April, July and October. CBIP is constantly referred to by order librarians, booksellers, researchers, and all those involved in book acquisition. In addition, CBIP is an invaluable record of the vast wealth of publishing and writing activity in the scientific, literary, academic and arts communities across Canada. A quarterly subscription service including the annual Author and Title Index (March 2001) plus quarterly microfiche updates (April, July, and October 2001) is also available. Het 80/20-principe Richard Koch 2017-11-18 Nieuwe editie van 'Het 80/20-principe', de klassieker van Richard Koch waar wereldwijd meer dan een miljoen exemplaren van verkocht zijn. Het 80/20-principe klinkt als een aardige vuistregel, maar het is meer dan dat: het is een wetenschappelijk bewezen principe. Richard Koch toont in dit boek aan dat het 80/20-principe voor organisaties te gebruiken is als analyse-instrument (met welke producten behalen we de hoogste winst?), en op persoonlijk vlak als denkmethode (op welke thema's moet ik focussen, wat zijn de beste oplossingen?). In beide gevallen is het resultaat: betere beslissingen, minder gedoe, meer effectiviteit. Op strategisch niveau, maar ook in je dagelijkse werk. Iedereen, van de CEO tot de professional, kan met dit boek zijn voordeel doen. Het helpt je te kiezen, te beslissen en sneller vooruit te komen. De jubileumeditie van dit standaardwerk is aangevuld met nieuwe hoofdstukken over de werking van het principe in (online) netwerken.

Education for America's Role in World Affairs John Fonte 1994 This collection of carefully argued essays examines what American students should know about world affairs in the post-cold war era. The issues which are examined are those that will continue to be debated as our schools prepare for the next century. The authors probe the complex and sometimes contradictory claims of global, peace, multicultural, and citizenship education. They offer prescriptions for change based on a strong academic core of history, international relations, government, economics, and geography, with the presumption of values consistent with America's democratic ideals. Contents: Foreword, Chester E. Finn, Jr.; Introduction, John Fonte and Andre Ryerson; A Brief History of Pre-Collegiate Global and International Studies Education, Andrew Smith; Global Education and Controversy: Some Observations, Robert Fullinwider; Teaching About the World and Our Nation's Heritage: The Relationship Between International Education and Education for American Citizenship, John Fonte; Implications of the 'New Demographics' and the 'Information Explosion' for International Education, Herbert London; International Education: The Search for Subject, Gilbert T. Sewall; International Studies in the School Curriculum, Diane Ravitch; Geography's Role in International Education, Raymond English; China: Case-Study of Textbook Failures, Andre Ryerson; What American Students Should Know About the World, Owen Harris; Conclusion, John Fonte and Andre Ryerson; Bibliography; Addendum; Index.

Principles of Mathematics + Teachers Guide Katherine Loop 2016-09-02 Katherine Loop has done the remarkable! She has written a solid math course with a truly Biblical worldview. This course goes way beyond the same old Christian math course that teaches math with a few Scriptures sprinkled in and maybe some church-based word problems. This course truly transforms the way we see math. Katherine makes the argument that math is not a neutral subject as most have come to believe. She carefully lays the foundation of how math points to our Creator, the God of the Bible. The nature of God, His Creation, and even the Gospel itself is seen through the study of math. Katherine does a marvelous job of revealing His Glory in this one-of-a-kind math course. Katherine Loop's Principles of Mathematics Biblical Worldview Curriculum is a first of its kind. It takes math to a whole new level students and parents are going to love. It is a guaranteed faith grower!
