**Intermediate Microeconomics** Walter Nicholson 2008-05-27 Intermediate Microeconomics offers a clear and concise treatment of microeconomic principles in a useful pedagogic framework. The mathematical level is approachable and uses basic algebra with extensions to calculus where it helps the analysis. The book is also strongly applied in focus and shows the relevance of theory in the "real world". Whilst these features make the book approachable to students, the theoretical content and overall learning experience is a rigorous one. In this adapted edition Peter Luke and Michael Wood have been brought in to adapt the text for the UK, European and South African market. Applications features in the book have been internationalised, and the European Social Model/US-UK model debate on the macroeconomy discussed at a micro level. This book is designed for students specifically studying economics at an undergraduate or postgraduate level such as MBA within the UK and EU in general, and South Africa. These students would be predominantly second-year students who have already taken an introductory course in microeconomics.

**Microeconomics** John P. Burkett 2006-04-20 In this book, John P. Burkett presents microeconomics as an evolving science, interacting with mathematics, psychology, and other disciplines and offering solutions to a growing range of practical problems. The book shows how early contributors such as Xenophon, Ibn Khaldun, and David Hume posed the normative and positive questions central to microeconomics. It expounds constrained optimization techniques, as developed by economists and mathematicians from Daniel Bernoulli to Leonid Kantorovich, emphasizing their value in deriving norms of rational behavior and testable hypotheses about typical behavior. Applying these techniques, the book introduces partial equilibrium analysis of particular markets and general equilibrium analysis of market economies. The book both explains how laboratory and field experiments are used in testing economic hypotheses and provides materials for classroom experiments. It gives extensive and innovative coverage of recent findings in cognitive psychology and behavioral economics, which not only document behavior inconsistent with some traditional theories, but also advance positive theories with superior predictive power.

*Encouraging Cooperation Among Competitors* William B. Tye 1987 Collective ratemaking in the motor carrier industry is undoubtedly one of the most poorly understood issues in the literature on economic regulation. While strongly held opinions are commonplace, real knowledge of the collective ratemaking process and of how trucking tariffs are constructed is scarce. William Tye closes this gap in our knowledge with the most comprehensive study yet of the effects of the Motor Carrier Act of 1980 on competition on the trucking industry.

**Waarom sommige landen rijk zijn en andere arm** Daron Acemoglu 2012-11-02 Het is een van de grote wereldvraagstukken: waarom zijn sommige landen rijk en andere arm? Ligt de verklaring in culturele verschillen, het klimaat of geografische omstandigheden? Of is er een andere oorzaak? Waarom is bijvoorbeeld Botswana een van de snelst groeiende economieën ter wereld en blijven andere Afrikaanse landen, zoals Zimbabwe en Congo, ondergedompeld in geweld en armoede? Daron Acemoglu en James Robinson laten overtuigend zien dat het de politieke en economische instituties zijn die het economische succes of falen van een land bepalen; instituties die innovatie en economische groei stimuleren en welvaart en vrede garanderen. De auteurs illustreren hun betoog met tal van fascinerende voorbeelden. Eén daarvan is Korea, een in wezen homogene staat. In Zuid-Korea legt de overheid verantwoording af aan de burgers en heeft de bevolking volop economische kansen; het land is zeer welvarend. Noord-Korea wordt dictatoriaal geregeerd en kent al tientallen jaren onderdrukking en hongersnood. Op basis van vijftien jaar veldonderzoek en historische research hebben de auteurs een nieuwe, overtuigende politiek-economische theorie geformuleerd. Waarom sommige landen rijk zijn en andere arm laat ons met andere ogen naar de wereld kijken en geeft een dieper inzicht in de oorzaken van armoede en rijkdom. Daron Acemoglu is hoogleraar economie aan het MIT. Hij ontving de John Bates Clark Medal. Degenen die deze onderscheiding krijgen, worden beschouwd als belangrijke kanshebbers voor de Nobelprijs. James Robinson is politiek wetenschapper en econoom. Hij is hoogleraar aan Harvard University en een wereldberoemde Latijns-Amerikaan Afrikadeskundige. 'Acemoglu en Robinson hebben een boeiend en zeer lezenswaardig boek geschreven.' Niall Ferguson 'In Why Nations Fail staan zo veel goede dingen, dat ik onmogelijk alles kan opnoemen.' Charles C. Mann 'Acemoglu en Robinson hebben een belangrijk boek geschreven, dat het verdient te worden gelezen door politici en economen waar ook ter wereld.' Het Financieele Dagblad 'Waarschijnlijk leest

u net als ik dit boek in één keer uit en neemt u het daarna nog vaak ter hand.' Jared Diamond, auteur van Zwaarden, paarden & ziektekiemen
