Many problems. The employee sees water pouring a good 2 feet over the spillway. (It was later estimated that the reservoir was holding 65 million gallons during and after the storm.) 11:00 p.m. Five inches of rain have fallen over the last 3 hours. 12:30 a.m. The employee sees a section of dirt break away. 1:00 a.m.

The Basics of Healthcare Failure Mode and Effect Analysis

Potential risks to patient safety have the obvious advantage of preventing adverse occurrences, rather than simply reacting when they occur. This approach also avoids the barriers to understanding created by hindsight bias and the fear of disclosure, embarrassment, blame, and punishment that can arise in the wake of an actual event.

To mix or not to mix - compatibilities of parenteral drug solutions

When it is diluted with water or saline is counter-intuitive. However, a small number of injection solutions are formulated in non-aqueous solvents to allow dissolution of a poorly water soluble substance in a small volume. In these formulations, dilution of the non-aqueous injection vehicle with water or saline may precipitate the drug.

High Blood Sugar (Hyperglycemia) - Michigan Medicine

First, drink plenty of water or sugar-free fluid to help "flush" the sugar from your bloodstream. Think about why your blood sugar is high! Blood sugar can be high due to:

- illness or infection
- stress
- less activity than normal
- missed diabetes medicine
- eating more carbohydrates
- a new medicine
